

CITS3001 Project Marking Sheet.

Name: _____

Student#: _____

Name: _____

Student#: _____

Criteria	Excellent	Good	Satisfactory	Inadequate	Comments	Weight
Identification and explanation of relevant literature	Comprehensive selection of techniques, with clear explanation of significance to the problem	A good selection of techniques, with clear explanation of significance to the problem	Relevant literature is selected and reference, but explanation lacks depth and insight	Literature is not relevant, lacks depth or adequate explanation		/20
Selection and design of appropriate AI technology	Good choice of design, with clear explanation and complete justification	Suitable choice of design with clear explanation and some justification	Suitable design chosen and explained, but justification lacking	Design is unsuitable, or not clearly explained.		/20
Implementation of agent	Complete and correct implementation with best practice data structures used.	Complete and well formatted code with suitable data structures	Mostly correct code with adequate data structures and algorithms	Not formatted or incomprehensible code, with flawed data structure choice		/15
Performance of Agent	Runs and performs at an excellent level with challenging play	Runs and generates realistic strategic play	Runs with some non-trivial strategic play	Does not run or trivial strategy		/15
Validation of Agent	Comprehensive tests, with insightful metrics	Good coverage of performance and complexity.	Some tests given, but results inconclusive or incomplete	Few or no tests, or no meaningful metrics used.		/15
Analysis of Performance	Clear analysis with deep insights	Clear insights based on evidence	Some conclusions and analysis given	No meaningful conclusions or analysis given		/15
Overall						/100
