This Session

- What is CoreLocation?
- What's a Location?
- Usefullness
CoreLocation

- Getting the Position of the current device
- Variation of WiFi, Triangulation and GPS
- Long, Lat, Speed, Direction
Hows it Done?

- DELEGATE!!!!
```objective-c
CLLocationManager *locationManager = [[CLLocationManager alloc] init];
locationManager.delegate = self;
locationManager.distanceFilter = 1000; // 1 K
locationManager.desiredAccuracy = kCLLocationAccuracyKilometer;
[locationManager startUpdatingLocation];
```
Using

- (void)locationManager:(CLLocationManager *)manager
didUpdateToLocation:(CLLocation *)newLocation
fromLocation:(CLLocation *)oldLocation
Your Turn

- Get and Print out the location to the Console
- Bonus points for anybody who can tell me what that location is
Its APPLE
